# Beauty Brief: Ask a doctor about EVOLENCE®.

Dermatology  
& Vein Institute

Dr. Tiffani Hamilton is board certified by the American Board of Dermatology and the American Board of Phlebology. She is a fellow with the American Academy of Dermatology, the American Society for Dermatological Surgery, the American College of Phlebology, the American Society for Laser Medicine and Surgery and the American Academy of Cosmetic Surgery. She is nationally and internationally recognized for her expertise in facial rejuvenation and cosmetic fillers. She is a pioneer in the aesthetic dermatology field and is considered an authoritative source.

**Question:** What is your approach to non-surgical facial enhancement?

**Dr. Hamilton:** The options for facial rejuvenation have increased dramatically over the last several years. Lasers and fillers now allow us to address the volume loss of aging in addition to correcting uneven skin tone and fine lines. At Atlanta Dermatology, Vein & Research Center, we have a full complement of lasers to address brown spots, red vessels, and fine lines. However, fillers are what can truly turn back the clock.

**Question:** Tell us how you use fillers to optimize your patients' results?

**Dr. Hamilton:** Dermal fillers can be categorized in many ways: volumizers vs. discreet wrinkle fillers; instant vs. delayed results; short vs. long lasting correction. Most patients require a combination approach. Each patient evaluated by us will be given a personalized approach and treatment plan based on their goals and budget.

One of the newest and most exciting fillers now available is Evolence. Evolence is injectable collagen filler which replaces the body's own lost collagen. Evolence is FDA approved for the correction of facial wrinkles and folds, such as "smile lines".

**Question:** Why is there less downtime with EVOLENCE®?

**Dr. Hamilton:** Unlike other fillers, Evolence causes much less bruising and swelling so patients get immediate results with little or no downtime.

**Question:** How long does EVOLENCE® last?

**Dr. Hamilton:** The natural results of Evolence last up to a year. Evolence can also be used in combination with lasers to give patients the ultimate in non-surgical facial enhancement.
