Energy to Healthcare

WHY TRILIFT?

If you feel your facial features, shape and youthful appearance are not what they used to be, trilift may be able to address several of your concerns in a single treatment protocol.

A three-layered procedure that achieves a face lift like effect:

- Firms and tones facial muscles from within and plumps the skin
- Immediately visible results and long-term effectiveness* ⁽¹⁾
- Sequential treatments with three technologies for more effective results than a single technology

*Clinical and histological results have been documented and appear to be maintained for at least four to six months following a typical treatment course of 8 weekly sessions

WHAT IS IT?

trilift is a new treatment, offering a three-step procedure that achieves an effect similar to a face lift. It is an invitation to love what you see in the mirror by rejuvenating and enhancing your facial features to their best

Is It right for me?

Lumenis energy-based treatments are not suitable for everyone and do carry some risks.

trilift treatment is not suitable for patients with pacemakers, defibrillators, or any implanted electronic devices, as well as metal implants in the treatment area. Risks may include damage to natural skin texture, skin redness, swelling, bruising, and itching. Be sure to consult with your treatment provider before choosing this treatment.

WHAT SHOULD I EXPECT?

When will I see results?

You should expect to see and feel a natural-looking improvement immediately after your very first treatment. For the best - and longer-lasting - results, a course of 4-6 treatments, once a week are highly recommended.

What can I expect after treatment?

You may experience some redness or swelling, depending on the course of treatment created for you by your practitioner.

This may last a couple of hours and up to a few days. In the following days, you may see and feel minor scabbing that will naturally heal and disappear.

Each trilift treatment takes about 30 minutes and you can return to your daily activities immediately after.

HOW DOES IT WORK?

With age, the skin is sagging and shows lines and wrinkles, the fat pads dwindle, causing facial depressions, and the muscles weaken and contribute to the sagging appearance and the distorted jawline.

trilift targets these 3 aging elements sequentially: structure, contour and texture. It utilizes complementary technologies and energy sources to stimulate the natural rejuvenation process in each element.

The result is an immediately visible face lift effect that is safe, pleasant, and quick, and improves over time with every additional treatment session

DYNAMIC MUSCLE STIMULATION

It activates the facial muscles with DMSt to achieve a well-defined, toned, and lifted look.

The facial muscles are just under the skin and control facial expression. When they contract, the skin moves, and at longer term will cause wrinkle and sagging.

TRIPOLLAR® RF

It thickens and strengthens the dermal layer to treat facial wrinkles with third generation TriPollar® RF by regenerating collagen and elastin.⁽¹⁾

TRIFX

It increases the natural volume and tightens and smoothens the skin texture with triFX RF microneedling skin resurfacing.⁽³⁾

3 X more natural production of Hyaluronic Acid for natural volume in a laboratory study

Percentage of improvement is compared to baseline; the number is rounded and may vary from one patient to another.
